

# HOW DOES **pure** WORK?

AQUEOUS OZONE

Our technology takes cold tap water and infuses it with ozone gas to create our **Aqueous Ozone Solution**. CleanCore Solution's™ patented technology creates a cleaning solution that contains an effective concentration of dissolved ozone.

- When in contact with a surface the aqueous ozone solution is attracted to soils, germs and other contaminants.
- Once attached to a contaminant, the ozone eliminates it, converting the solution back to air and water.

**pure**   
AQUEOUS OZONE

- No storage, mixing, transporting
- Cleaning and sanitizing with one application
- Converts back to air and water, reducing your carbon footprint
- A safer, healthier path to clean!
